can breathe in the droplets, including the COVID-19 virus if the person has the disease.

from WHO.

and infect you.

you from viruses such as cold, flu and COVID-19.

The only option is to be safe and stay home! Lastly, below is the advisory

Regularly and thoroughly clean your hands with an alcohol-based hand rub or wash them with soap and water. Why?

Maintain at least 1 metre (3 feet) distance between yourself and others. Why? When someone coughs, sneezes, or speaks they spray small liquid droplets from their nose or mouth which may contain virus. If you are too close, you

Avoid going to crowded places. Why? Where people come together in crowds, you are more likely to come into close contact with someone that has COIVD-19 and it is more difficult to maintain physical distance of 1 metre (3 feet).

contaminated, hands can transfer the virus to your eyes, nose or mouth. From there, the virus can enter your body

Make sure you, and the people around you, follow good respiratory hygiene. This means covering your mouth and nose with your bent elbow or tissue when you cough or sneeze. Then dispose of the used tissue immediately and wash your hands. Why? Droplets spread virus. By following good respiratory hygiene, you protect the people around

Stay home and self-isolate even with minor symptoms such as cough, headache, mild fever, until you recover. Have someone bring you supplies. If you need to leave your house, wear a mask to avoid infecting others. Why? Avoiding contact with others will protect them from possible COVID-19 and other viruses.

Washing your hands with soap and water or using alcohol-based hand rub kills viruses that may be on your

Avoid touching eyes, nose and mouth. Why? Hands touch many surfaces and can pick up viruses. Once
